

# MELCHOR CALLOS

SOFTWARE TESTER /  
SOFTWARE PROGRAMMER

## CONTACT ME AT

- ☎ +639669027597
- ✉ melchorcallos04@gmail.com
- 📍 Sta. Rosa City, Laguna

## SKILLS SUMMARY

- Software Programming
  - COBOL, C, C++, C#
  - JavaScript, Java
- Software Testing
  - Selenium
- Database Management
  - MySQL
- Website Development
  - HTML, CSS, Bootstrap, MUI,
  - React JS
- Other Software
  - MS Excel, Photoshop, Arduino

## EDUCATION

- BS in Information Technology
  - June 2014 – April 2018
  - Polytechnic University of the Philippines

## ABOUT MYSELF

I am a nice, fun, and friendly person. I am open to taking on new challenges, highly motivated to improve myself in order to expand my knowledge and experience, and a productive team player as well as an individual.

## WORK EXPERIENCE

### Software Quality Assurance Engineer

*Alsons/Aws Information Systems Inc.*

From August 2019 to October 2019, I participated in a bootcamp where I developed skills in functional and automated testing. I learned how to use Java programming languages and tools like Selenium, UFT, and ALM. Then, from November 2019 to August 2021, I worked as a unit tester, where I performed white-box testing using C++, winAMS, and MS Excel. I created and executed test cases, produced test results, and reported any issues or bugs found during testing.

### Programmer Analyst

*Vertere Global Solutions, Inc.*

From January 2019 to May 2019, I participated in a bootcamp where I learned how to use programming languages such as COBOL, JCL, and DB2 to create efficient and effective programs for mainframe systems.

### Research & Development Programmer

*JIO MHW Global Channel Manufacturing Corp.*

From December 2017 to November 2018, I worked as an intern and later as an R&D programmer. During my time there, I was responsible for developing and designing an embedded application, utilizing my skills in programming languages such as C++ and C#, as well as tools such as MS Visual Studio and Arduino. I was also responsible for maintaining its functionality and conducting research to improve its performance.
